Education

Stevens Institute of Technology (2022-2026)
Bachelor's of Science in Computer Science (minor in Visual Arts & Technology)
Cumulative GPA: 3.93

Skills

- **Web Development** - React, Express, MongoDB, SQLite, GraphQL, REST APIs, Docker, Tailwind, jQuery.
- **Agentic AI** - OpenAI / Anthropic API, Vercel AI SDK
- **Systems Programming** - Linux, C/C++, Assembly, GDB, Bash
- **Data Science** - Python, Pandas, Jupyter Notebook, R, SQL
- **VCS** - Git, GitHub, Bitbucket
- **Microsoft Office** - Excel (openpyxl), Word, PowerPoint, Smartsheet

Courses

Knowledge Discovery and Data Mining, Concurrent Programming, Operating Systems, Web Programming II, Database Management, Agile, Systems Programming, Data Structures, Algorithms, Computer Architecture

Professional Experience

Software Development Intern at Agentuity

- 2025/05 – present
- Developed AI Agents using several frameworks including OpenAI and Anthropic.
- Created a Smartlead Agent as a part of a multi-agent Customer Relationship Management system, which receives incoming emails, adds data to database, and sends auto-replies.
- Worked with technologies such as: memory layers, code sandboxes, vector storage, multi-agent orchestration.

Course Assistant at Stevens Institute of Technology

- 2024/08 – present
- Taught labs, hosted office hours, and graded assignments for Computer Architecture and Systems Programming.
- Utilized C/C++, Assembly, Linux, and Bash.

Development Intern at Mericle Commercial Real Estate Services

- 2024/05 – 2024/08
- Researched, developed, and pitched solutions for AI and API integrations to automate document control.
- Created a tool for scheduling employee trainings, streamlining training process and enhancing organization.
- Utilized Selenium, Chromedriver, openpyxl, and REST APIs.

Research Assistant at LIINES of Stevens Institute of Technology

- 2023/05 – 2024/05
- Acquired and visualized data from the U.S. Energy Information Administration, coordinating and compiling over 10,000 figures into a comprehensive book. Automated data retrieval and visualization via Python libraries.
- Utilized Python, Jupyter Notebook, Pandas, Matplotlib, REST APIs, LaTeX, and BitBucket.

Projects

Harmonize

- A full-stack web programming project utilizing the Spotify Web API which allowed users to engage in community discussions about tracks and albums.
- Utilized Node.js, React, Elasticsearch, Docker, GraphQL, Firebase Auth, MongoDB, HTML, CSS, and Git/GitHub.

MOBIUS LINE

- A multimedia interactive art project that had participants solve the mystery of a fictitious band's (MOBIUS LINE's) unreleased song.
- Utilized React.js, Procreate, Photography, Writing Skills, Social Media.
